The Lapex BCS is a new and innovative technology that has been approved spot fat reduction and body contouring in Canada and Europe.

The Lapex BCS is one of the tools that we can use to help you reach your goals and the real advantage of this technology lies in the fact that we can specifically target a trouble area. Once the fats have been released from the cell they can be used by the body as a fuel source. It is therefore critical that the dietary and lifestyle changes are made to help support the goals of treatment.

A reduced calorie diet and an exercise program that will help to burn approximately 350 – 500 calories post treatment are ideal. Individual results may vary and it is the responsibility of the client to ensure they are doing the appropriate home care to ensure maximum results. Clients should be consuming a caloric intake equivalent to their target weight (lbs) multiplied by 10. For example a 220 lb male who wants to reach 200 lbs should be consuming a daily intake of 2000 calories. In some cases additional support may be required for lymphatic drainage to help stimulate the body to clear the fats that are released from the cell. Most clients experience a 1/2 inch reduction with each treatment and multiple inches can be lost with a series of treatments. Ensure Your Best Results :

Avoid consuming large amounts of water prior to treatment(s)

Don't eat 4 hours prior to treatment(s)

Drink plenty of water after every treatment

Incorporate Whole Body Vibration (WBV) post treatment for 10 minutes or

Ensure you undertake physical activity following each treatment to maximize your results Manage caloric intake; excess calories will counteract the laser treatments

Alcoholic beverages and high sugar content drinks must be avoided before and after treatment(s)

### Client Agreement
